ITC4182 Professional Practices in ICT
Assignment 3

Analyze an ICT-related Intellectual Property (IP) case study. Choose a case where software patents, copyright issues, or trademark disputes were involved.

Write a report on the case study based on the following areas.

1. **Describe** the case, including involved parties and the legal issue.
2. Identify the **type of IP rights** involved (for example, patents, copyrights, trademarks).
3. Discuss the **implications of the case** on software development and innovation.
4. Provide a **personal reflection** on how developers can protect their work legally and ethically.

Submission

- Submit the report in **pdf** format with the file name using the following naming pattern.

ITC4182_Assignment3_[index number]

- The report should be **less than 2500** words. In the cover page, include your name and index number.

Deadline: **February 17, 2025**
