

Digital Business Opportunities & Technology Applications in Business

DIGITIZATION of a Business

Digital Transformation

The integration of digital technology into all areas of a business resulting in fundamental changes to how businesses operate and how they deliver value to customers.

“Digital transformation closes the gap between what digital customers already expect and what analog businesses actually deliver.”

- Greg Verdino

WHAT IS REQUIRED?

“[Digital transformation] involves a change in leadership, different thinking, the encouragement of innovation and new business models, incorporating digitization of assets and an increased use of technology to improve the experience of your organization’s employees, customers, suppliers, partners and other stakeholders.”

IMPLEMENTATION

Direct

When a new system is implemented without any phased or pilot implementation, it is said to be direct. The old system is retired, and the new system goes live.

Parallel

When the new system is used at the same time as the old system the two systems are said to be running in parallel.

Phased

When small parts of the new system gradually replace small parts of the old system, the implementation method is said to be phased.

Pilot

When a small group of users within an organization uses a new system prior to wider use, the system is said to be piloted.

A small white hexagon in the top left corner and two larger white hexagons in the top right corner, one slightly overlapping the other.

HOW IT CAN HELP A BUSINESS TO GROW?

- **Cost Reduction**
- **New Markets**
- **Relationship Building**
- **Automation**
- **Better Market Intelligence**
- **Outplay the Competition**

WHY DIGITAL TRANSFORMATIONS FAIL?

- Unclear goals/plan
- Lack of expertise
- Internal resistance
- Ignoring customer experience
- Lack of management support
- Conducting digitization too fast
- Not understanding the customers' needs
- Not changing the internal culture
